
OVER LABELLING

Due to an increasing demand for over labelled medicines to help treat patients quicker, we have launched a 'special' service following the opening of our new purpose built MHRA approved facility in Northumberland. We can now provide Hospitals, Primary Care Trusts and Ambulance Services with over labelled licensed medicines suitable for out of hours dispensing.

As part of our unique customer-led over labelling service, we will:

- Source the product you require at a competitive price;
- Over label and hold the stock for you in our warehouse (paying as you go!);
- Deliver your over labelled products **within 24 hours** of receipt of a purchase order, helping us free-up storage space in your dispensary.

In addition, we will monitor your stock levels, advise you of when your stock is running low, trend your usage patterns and act as a support function to your hospital dispensary to help improve planning and maximise your departmental efficiency.

We have no minimum order quantity for any line and each batch is released with a Certificate of Conformity (CoC) by a Qualified Person to meet with our stringent GMP guidelines.

New product lines can be set-up within just 5-7 days based on a technical agreement. If you choose to order in bulk at the start, this ensures that goods are constantly ready for despatch and helps us to maintain a flexible and pressure-free service with unrivalled turnaround.

What's more, should you choose to set-up a supply agreement on your bulk order, you will benefit from a fixed price for six months.

We label any packs, product type, size and quantity. We are also able to provide you with over labelled fridge line products, flagged medicines, a barcode on the labels and a bespoke free of charge design service to meet your specific requirements and specifications. Sample packs and labels are available on request. All products are competitively priced, however if requested, we will quote for specific brands.

The new service is proving to be of great benefit to our customers and we are already supplying a number of hospitals across the UK. If you would like us to provide you with a free quotation, then feel free to get in touch. Any prices quoted are per pack, inclusive of labelling.

Note: This is not a definitive list of products. It is a list of our current high frequency lines. All product lines are provided with a Certificate of Conformity. Please call us for details on other lines.
